Lathe Machine

Bending Machine

Printing Machine

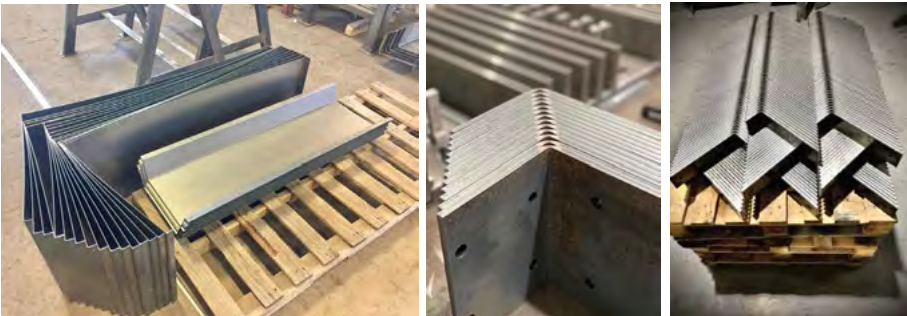

OUR Machinery Support:

Thick steel plate welding, high temperature annealing and natural aging eliminate the welding stress, no deformation for long-term use, low vibration, and high cutting accuracy. Rough machining, semi-finishing and finishing ensure high accuracy of guide rail.

We can cut, All kinds of metal materials stainless steel, carbon steel, galvanized steel, aluminum, copper, and iron, etc.. up to 25mm.

The thickness of this kind of metal laser cutting machine generally does not exceed 25mm.
