INDUSTRIAL AIR POLLUTION CONTROL EQUIPMENTS

A COMPLETE SOLUTION AGAINST AIR POLLUTION

SAGAR is a technology driven organisation affianced in catering the plethora of air pollution control equipment along with waste heat recovery and chemical process equipment. Our wide variety of products comprises of centrifugal fans, dust extraction system, pulse jet bag filters, scrubbers, chimney screw conveyors, waste heat recovery with air pollution control, pond ash flash Dryer and rotary air valve.

Our system is a customer oriented and based on application engineering the most appropriate equipment is designed and selected. Our products are highly applauded by the clients for their salient features like sturdy construction, resistance to corrosion & abrasion, low maintenance, easy installation, accurate dimensions and durability.

Dust Collector System

Dust Extraction System

Dust Extraction Systems

Venturi Scrubber

Packaged Tower Scrubber

Non Standard Scrubbers

Venturi Scrubber

Packaged Tower Scrubber

Cyclone Separator

Bag filters & Chimney

As far as the usages are concerned, these pulse jet bag filters are basically used in air pollution control equipment. The finest part of this system is that it can filter heavy dust burdens and achieve desired collection efficiency at high temperature. Reverse pulse jet bag filter serves for dry separation of dust from waste gas.

Bag filter & CycloneBoiler

Flue gas bag filter

Chimney

Pulse Jet bag filter

Bag Dumping Station
